

Anaphylaxis First Aid Awareness

This course is for anyone who needs training in how and when to use an auto injector in the treatment of anaphylaxis.

Who should attend?

With 40% of children now suffering from allergies, the ability to understand allergic conditions, and deal with sudden or severe symptoms is fast becoming an essential part of childcare. Workplace first aiders who have to deal with those prone to anaphylaxis should also attend.

We welcome young people from the age of 12 onto all our community first aid courses. If under the age of 16, you must attend with a responsible adult member of the family or guardian (two young people per adult).

What you will learn

Prevention, recognition and treatment of severe allergic reaction including the use of auto-injectors and CPR.

Course content

- allergic reaction
- communication and casualty care
- unconscious casualty
- auto-injector - EpiPen®, JEXT® or Emerade®
- resuscitation - all ages
- primary survey

Course duration

3 hours contact time

Assessment and certification

Continuous assessment by the course tutor.

Successful attendees will receive a certificate of competency that is valid for 3 years.
